

DESCRIPTION

Tired of washing your dishes by hand? Use these products with your commercial dishwashers. If you are lost, here is a guide to help you choose:

Products that can be used with both high and low temperature machines:

Dishwashing Detergent - A concentrated product that will clean all your dishes, your glassware as well as your pots and cooking pans. Also helps to eliminate scale deposits inside your machine.

Chlorinated Dishwashing Detergent - An economical detergent specifically formulated for glassware and oil based stains.

Hard Water Dishwashing Detergent - Your water comes from a well? Moving would be too complicated? This is our solution to clean your dishes and eliminate all that scale built up inside your machine.

Rinse Agent - A recipe for all your machines, even your dishwasher at home. Used to dry and eliminate any soap residue on your dishes. No need to wipe your glasses so you can enjoy doing more of the good things in life.

Pre-Soak Liquid or Powder - Do you like seeing yourself clearly in your silverware? We do! Use this product to dislodge any difficult to remove food left overs. Simply soak your cutlery before passing through your dishwasher.

Products to be used in low temperature machines:

Sanitizer - Contains bleach to eliminate all those undesirable bacteria from your dishes. Just won't eliminate them from your life.

Products for residential dishwashers.

Dishwashing Powder - For those that want to control how much detergent to use in their dishwashers.

Rinse Agent - A recipe for all your machines, even your dishwasher at home. Used to dry and eliminate any soap residue on your dishes. No need to wipe your glasses so you can enjoy doing more of the good things in life.

DIRECTIONS

A recipe for all your machines, even your dishwasher at home.

Adjust the flow of the detergent according to the equipment manufacturer's or the technician's recommendation. We suggest the following dilution:

- 10ml CLASSIK Automatic Dishwasher Detergent
- 2ml CLASSIK Rinse Agent
- 4ml CLASSIK Sanitizer (for low temp machines)

FOR USE IN FOOD PLANTS:

Surfaces in direct contact with food must be rinsed with potable water after treatment with the product.

ENVIRONMENT AND CERTIFICATION

- ✓ Works in both high and low temp machines
- ✓ Phosphate Free
- ✓ CFIA (Supplier Letter of guarantee)
